

# NEW Energy-Efficient Glass Option

Achieve 0.27 U-Factor or Lower

## PLUS 4TH SURFACE LOW-E COATING

PLUS indicates the addition of a new energy-saving 4th surface Low-E glass. This innovative glass technology reflects heat back into the room, making your living space feel warmer and more comfortable in cold climates.

These new glass options not only help to achieve the comfort and energy savings you're looking for, but now also achieve ENERGY STAR version 6.0 Northern zone criteria via the Prescriptive path.

The new PLUS 4th surface Low-E coating enables U-Factors of 0.27 or lower for the following product series:

platinum  
gold  
silver

### When ordering one of these glass options in the AccuQuote software:

Simply enter the zip code of the job location at prompt.

Performance and Ratings Options	
Customer Elevation	Below 7000 ft ✓
Zip Code? (Job Location)	26362
Energy Star Climate Zone	Energy Star North Central
TDI	WIN-1308

This will filter the glass package answers to show the 0.27 U-Factor glass package that is appropriate for the job location.

**Glass Packages**

Standard Glass Options
